## Are eugenics responsible for the black population flat-lining?

By [David McCaine](#), San Jose Christian Perspectives Examiner

Perhaps the most ironic award given to Martin Luther King was being the recipient of the Margaret Sanger Award in 1966 who Sanger helped preach eugenics; even at Ku Klux Klan meetings. This same racist policy has been a hidden platform of current day abortion clinics. <http://en.wikipedia.org/wiki/Eugenics>

Planned Parenthood has domesticated Sanger's theories, however many abortion clinics have still thrived in economically depressed areas due to eugenics being implemented in a "kinder and gentler way".

The atrocities revealed at a Philadelphia abortion clinic had one part of its facility for the poor and another venue for its upscale clients, a testament to separate treatment based on class status...a shining example of eugenics in action. <http://www.examiner.com/christian-perspectives-in-san-jose/brutality-of-abortion-rears-its-ugly-head>

A quote from Sanger said, "sterilizing those designated unfit" would benefit society. Nazi Germany adopted eugenics as the main platform for the extermination of Jews, gypsies, mentally challenged, disabled or anyone else not fitting the Aryan master profile.

Most journalists present a one dimensional view when they write about volatile subjects as race relations. The tendency is to view the world through their own perspective and rose colored glasses.

A typical case involves the "liberal" San Jose Mercury spinning a story on the racial demographics of the Santa Clara County area. The most glaring statistic was ignored by the reporter. Here is the racial breakdown of the story that ran March 9th of this year regarding population increases:

White, Non-Hispanic

1. Monte Sereno      77.2%

Advertisement

2. Los Gatos	77.0%
3. Los Altos	67.8%
4. Los Altos Hills	66.1%

#### Asian

1. Cupertino	63.3%
2. Milpitas	62.2%
3. Saratoga	41.4%
4. Sunnyvale	40.9%

#### Black

1. San Jose	3.2%
2. Milpitas	2.9%
3. Campbell	2.9%
4. Mountain View	2.7%

#### Hispanics

1. Gilroy	57.8%
2. Morgan Hill	34.0%
3. San Jose	33.2%
4. Mountain View	21.7%

Mercury reporter Joe Rodriguez ignored the most glaring statistic of blacks showing practically no growth compared to other racial groups. While every ethnic group enjoyed robust growth of at least 50%, the best statistic on black growth was a pitiful 3.2% increase in San Jose.

It's been six months since this damning fact came out with no adequate analysis from anyone. The silence is telling enough.

So why is the black population flat-lining or going down in nearly every area? Oakland is down 23%, San Francisco is down 19%, Milpitas is down 14%, and the "radical" black genocide website seems to be the only

source speaking out against the poor showing in black growth statistics.

National Columnist Star Parker wrote one opinion on abortion being the ruining of the black community and now statistics appear to be backing her up. Too many black, poor single mothers are being “targeted” for abortions. The growth of middle and upper class blacks have also slowed considerably.<http://www.gosanangelo.com/news/2011/jan/18/no-headline---col2parkersh/>

<http://www.onenewsnow.com/Culture/Default.aspx?id=1329294>

Naturally you would probably receive a calculated explanation from Planned Parenthood regarding the disproportion of black females receiving abortions which vary from 30% to 45% of all abortions depending on who you talk to. There would be denial that eugenics had anything to do with it.

If nothing else the growth picture is troubling for the black segment of society. Abortion is probably one factor but it’s disquieting to see so many city segments in California reporting lower or no significant increases in black population growth.

It’s not an accident, the numbers are too significant for that compared to other racial groups....and if it’s not an accident, then it’s by design.
